Regarding independent claim 29, the prior arts fail to teach "a plurality of amplification circuits coupled to the antenna and coupled in series, each amplification circuit adapted to selectively amplify upstream signals in a selected frequency band for a selected service and to pass downstream signals and other upstream signals" as cited in the claim.

Regarding dependent claim 25, the prior arts fail to teach "each base station includes an amplification circuit that amplifies signals received from wireless terminals for one of the service and that passes without amplification signals from other wireless terminals for the other service and passes downstream signals to the wireless terminals" as cited in the claim.
